SECUR-A-SEAL™ offers economical bundling along with a tamper evident head design. Secur-A-Seal™ is UL listed and is used for applications requiring a lower tensile strength. Secur-A-Seal™ is manufactured from polypropylene.

The Security Tie

is revolutionizing the ski industry by addressing a growing problem in ski areas and resorts throughout the United States—revenue lost by skiers “sharing” or re-using lift tickets. Fastening lift tickets with a standard cable tie or some other non-secure method provides skiers with the option of removing their tickets and reselling them to other skiers. Consequently, the ski areas lose sales. The Avery Dennison™ Security Tie is a safe, affordable, and versatile alternative for tamper-resistant, dependable closures. It is available in several colors and contains no protruding parts, ensuring user safety. Applications for this tie include but are not limited to ski areas. These ties can be used in any situation where a fixed bundle and a tamper-resistant closure are necessary.
