| 63   | Ductile, Nickel—QQ-N-290                         |

**NOTES:**

- Two screw locks are required per connector.
- Other combinations of body length (B) and male length (C) are available.
- Partially threaded male ends are available.
- \*Most common material is steel with optional finish.
- A 6" lb. (female) and a 4" lb. (male) maximum assembly torque is recommended for steel screw locks.
- All dimensions are for reference only. Tolerances are to manufacturer's standards.
